

4 – VETOR

JAVA – <https://judge.beecrowd.com/pt/problems/view/1172>

```
using System;
```

```
class URI {
```

```
    static void Main(string[] args) {
```

```
        Scanner in = new Scanner (System.in);
```

```
        int a[], i;
```

```
        final int TAM = 10;
```

```
        a = new int [TAM];
```

```
        for (i=0; i<TAM; i++) {
```

```
            System.out.println("Digite o "+i+" elemento do vetor");
```

```
            a[i]= in.nextInt();
```

```
}
```

```
        for (i=0; i<TAM; i++){
```

```
            if(a[i]<=0){
```

```
                a[i] = 1
```

```
                System.out.println("a["+i+"] = "+ a[i]);
```

```
            } else {
```

```
                System.out.println("a["+i+"] = "+ a[i]);
```

```
            }
```

```
}
```

```
}
```
